DETAILED ACTION

Claims 51 and 52 are currently pending in the instant application, appear allowable over the prior art of record and have been renumbered as claims 1 and 2. Applicants' amendment filed 6 November 2009 has overcome the 35 USC 112 1st paragraph rejection as the phrase "multi-step batch" has been removed from the claims.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance. This invention relates to processes for the preparation of 7-methoxy-6-(3-morpholinopropoxy)-3,4-dihydroquinazolin-4-one of formula II. The novel and nonobvious aspect of this invention involves the intermediates of formulas IV and V. The instant claimed processes do not isolate these intermediates, but continue onto the next step whereas the prior art references isolate the intermediates of formulas IV and V. The prior art references fail to teach or suggest the instantly claimed processes. Additionally, according to *In re Freed*, 415 F.2d 785, 165 USPQ 519 (CCPA 1970) wherein the performance of a prior art "two-pot" process as a "one-pot" process may be evidence of nonobviousness because it can be logically assumed that the prior art set forth the least number of steps thought to be necessary. Applicants instantly claimed process allows a substantial reduction in the number of intermediates that must be isolated and yet allows final product to be made in high quality and yield on a large scale (specification page 2, lines 7-14).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1626

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
